

# **Eloro Resources Ltd.**

## **Management's Discussion and Analysis**

This Management's Discussion and Analysis ("MD&A") provides discussion and analysis of the financial condition and results of operations of Eloro Resources Ltd. (the "Company") for the 6 months ended September 30, 2016 and should be read in conjunction with the unaudited condensed interim consolidated financial statements and the accompanying notes. The MD&A is the responsibility of management and is dated as of November 29, 2016.

All dollar amounts are stated in Canadian dollars unless otherwise indicated. Additional information relating to the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).

### **Forward-Looking Statements**

This MD&A may contain, without limitation, statements concerning possible or assumed future operations, performance or results preceded by, followed by or that include words such as "believes", "expects", "potential", "anticipates", "estimates", "intends", "plans" and words of similar connotation, which would constitute forward-looking statements. Forward-looking statements are not guarantees. The reader should not place undue reliance on forward-looking statements and information because they involve risks and uncertainties that may cause actual operations, performance or results to be materially different from those indicated in these forward-looking statements. The Company is under no obligation to update any forward-looking statements contained herein should material facts change due to new information, future events or other factors. These cautionary statements expressly qualify all forward-looking statements in this MD&A.

### **The Company**

The Company is a Canadian-based gold exploration and development company with a gold-silver property in Peru and base metal properties and royalties in the province of Quebec.

The Company is a reporting issuer in Ontario, Alberta and British Columbia and its common shares are listed for trading on Tier 2 of the TSX Venture Exchange ("TSXV") under the symbol ELO and on the Frankfurt Stock Exchange under the symbol WKN 909833.

### **Overall Performance**

#### **Private placement of units**

On August 25, 2016, the Company completed a non-brokered private placement of 1,800,000 units of at a price of \$0.30 per unit for proceeds of \$540,000 ("Private Placement"). Each unit consisted of one common share and one-half of one warrant, with each whole warrant entitling the holder to purchase one common share for \$0.45 until February 25, 2018. Of the private placement, a director of the Company acquired 500,000 units. In connection with the Private Placement, two arm's length finders received as compensation a 7% cash commission aggregating \$5,250 and 17,500 finder's warrants each entitling the holders to purchase one common share for \$0.45 until February 25, 2018.

Previously, on May 3, 2016 and May 10, 2016, the Company completed a non-brokered private placement of 2,352,942 units at a price of \$0.17 per unit for proceeds of \$400,000. Each unit consisted of one common share and one-half warrant, with 1,029,412 warrants and 147,059 warrants entitling the holder to purchase one common share for \$0.30 until May 3, 2018 and May 10, 2018 respectively. Of the private placement, directors, officers and persons related to them and a director of Cartier Iron Corporation (a company which owns approximately 10.5% of the issued and outstanding common shares of the Company), acquired 1,041,174 units.

#### **Definitive agreement to acquire La Victoria Gold/Silver Property, Peru**

On August 4, 2016, the Company entered into a definitive agreement with Tartisan Resources Corp. ("Tartisan") to acquire a 100% interest in the La Victoria Gold/Silver Property ("La Victoria") and terminate the option to acquire a 60% interest in La Victoria. As consideration for the acquisition, the Company will:

- a) pay \$250,000 on the closing date and \$100,000 on April 17, 2017;
- b) issue 6,000,000 common shares ("Common Shares") with a fair value of \$2,460,000;
- c) grant 3,000,000 warrants ("Warrants") entitling the holder to purchase one common share for \$0.40 until October 17, 2019, provided that, after April 17, 2018, if the average closing price of the Company's common shares is at least \$1.00 per share for 20 consecutive trading days, the Company may accelerate the expiry date of the warrants on 45 days' notice.
- d) grant a 2% net smelter royalty with an option to reduce the NSR to 1% for consideration of \$3,000,000.

On October 17, 2016, the acquisition of La Victoria closed in escrow, pending recording and registration of all applicable transfers with the proper authorities in Peru. The acquisition created a new "Control Person" in the Company, pursuant to applicable securities legislation, as the Company issued Tartisan 6 million Common Shares and 3 million Warrants (representing 22.4% of the common shares of the Company on a non-diluted basis, and 30.2% of the common shares of the Company on a partially-diluted basis, assuming the exercise of only the Warrants held by Tartisan).

Title to the San Markito concession will not be transferred to the Company until the final payment of \$100,000 is made.

The Common Shares issued to Tartisan are subject to the following terms:

- a) until April 17, 2018, Tartisan shall not sell, transfer, mortgage, hypothecate, grant a security interest in the Common Shares without the prior written consent of the Company, and thereafter, until April 17, 2021, Tartisan shall not sell more than 1,000,000 Common Shares during any 6-month period;
- b) Tartisan agrees to provide the Company with 45 days' notice prior to any sale, during which time, the Company would have the right to identify purchasers for the Common Shares and have the right of first refusal to place the Common Shares pursuant to the terms of a mutually agreeable sale;
- c) until October 17, 2018, Tartisan shall have the pre-emptive purchase right to participate in financings by the Company ("Subsequent Offering") to acquire a number of common shares which would result in its proportional interest held immediately prior to such Subsequent Offering being maintained immediately following the closing of such Subsequent Offering, up to a maximum of 19.9%;
- d) until October 17, 2020, Tartisan shall not vote, or encourage anyone else to vote:
  - (i) against any shareholder resolution recommended by the Board, except the event of change of control of the Company or failure by the Company to maintain its status as a reporting issuer under securities law in Ontario;
  - (ii) in favour of the election of nominees to the Board not proposed by the then incumbent Board; or
  - (iii) in favour of any shareholder resolution or proposal unless the then incumbent Board recommends voting in favour of such shareholder resolution or proposal.

#### Ongoing Exploration at La Victoria

On June 7, 2016, the Company announced the commencement of a follow-up surface exploration program at La Victoria. The exploration program focused particularly on the Rufina West Oxide Gold Zone, a low sulphidation epithermal target where there is extensive artisanal mining activity and the adjacent Rufina East Sulphide Zone in the southern part of the property. Previous sampling by the Company has indicated the presence of significant high grade gold and silver values in these areas (see press releases October 8, 2015 and August 12, 2015). Completed work included an Induced Polarization Survey, geological mapping and lithogeochemical sampling. The Company retained noted Andean epithermal gold expert Dr. Osvaldo Arce Burgoa to conduct the mapping and targeted sampling program.

This work program was incorporated in a new National Instrument 43-101 Technical Report ("Technical Report"), which was filed on September 7, 2016, authored by Mr. Luc Pigeon, M.Sc., P.Geol. The Technical Report was filed as one of the terms precedent to the acquisition of La Victoria and is available under the Company's profile on SEDAR ([www.sedar.com](http://www.sedar.com)).

As outlined in the Technical report, four principal mineralized zones are identified at La Victoria: San Markito, Rufina, Victoria and Victoria South. The Rufina and San Markito zones are the most advanced targets and are recommended for drilling whereas the Victoria and Victoria South zones are at an early exploration stage. In general, mineralization occurs within breccias and veins that contain significant gold and silver concentrations and trace element characteristics that are compatible with epithermal deposits especially the low sulphidation type.

A two-part Phase I exploration program was recommended in the Technical Report. The first part is budgeted at US\$250,000 and includes permits, road work and drill pad construction for the diamond drill program, with detailed follow-up mapping, sampling and geophysical surveys. The Part 2 drill program is budgeted at US\$850,000 and includes 3,000m of diamond drilling at San Markito and Rufina. The Company has initiated discussions with several drill contractors in Peru for the Phase I drilling program.

#### Exploration Targets

La Victoria is located within a prolific epithermal gold deposit belt that extends from Cajamarca to Ancash and includes such gold deposits as Yanacocha, Lagunas Norte and La Arena. The La Arena mine is located 50km northwest of the property.

At the Rufina mineralized zone, five vein sets of 20m to 70m in width were identified at the Rufina West mineralized zone, with lengths ranging from 10m to possibly 500m, with an average exposure of some 150m. Vein sets are composed of iron oxide-quartz-arsenopyrite-hydroxide-sulphate minerals in veinlet swarms, stockworks, and breccia zones. Veins are dominantly tensional, and are characterized by open space filling fabrics. Mineralization below the oxidation layer contains

pyrite, bornite, chalcocopyrite, and arsenopyrite, and where a 40-cm chip sample massive arsenopyrite sample carried 68.3 g/t gold, 52.7 g/t silver, and 0.77% copper. Chip channel sampling within the Rufina mountain underground workings identified several gold rich arsenopyrite veins. One sample returned an elevated gold concentration of 15.1 g/t Au over 0.5 m and 136.4 g/t Ag, 1.61% lead and 3.75% zinc. Three alteration samples from the recent sampling returned an averaged 8.8 g/t gold and 23.8 g/t silver.

Structural settings include faults and fractures bounded by brittle-ductile fault systems and shear zones. They are well developed in intrusive rocks as well as underlying sediments of the Chicama Fm.

The 2D inverse geophysical interpretation from the induced polarization survey shows that the high resistance diorite (the main mineralized lithology present on the Rufina zone) is concentrated near the surface and is underlain by conductive and chargeable sedimentary rocks. There appears to be a chargeability anomaly concentrated along the contact between the diorite and the underlying Chicama Fm sediments; since the anomaly also shows a higher resistivity value than what is usual for the Chicama Fm, it is interpreted to be mineralization along the contact; this is a high-priority drill target.

The San Markito mineralized zone is approximately 1300m long and 400m wide and is open along strike to the northwest. Mineralization occurs within breccias and veins that strike northwest and dip to the northeast at between 55 and 80 degrees. The breccias vary in lengths between 30m and 200m with widths between 5m and 20m; veins are between 20cm and 1.0m in width and have been traced up to 160m, although most identified veins are between 10m and 20m long. The breccia mineralization is composed of quartz, pyrite, arsenopyrite, iron-oxide, malachite and other secondary oxides and sulphates minerals whereas the vein mineralization is composed of quartz, arsenopyrite, chalcocopyrite, pyrite, iron oxides (limonite), hydroxides (goethite) and sulphate (jarosite).

San Markito gold and silver values range from trace values to 2.27 g/t gold in the veins and to 1,814 g/t silver in the breccias. Lead, arsenic, and antimony are also enriched with lead reaching 16.82% and the latter two over the 1% analytical limit. In addition, copper values from two breccia samples returned anomalous values up to 2.31%.

The Victoria South zone is located between San Markito and Rufina zones. The host rocks are dominantly the Upper Jurassic Chicama Formation. The zone is comprised of structural vein sets ranging between 5 to 30m in width composed of iron and manganese oxides, quartz, arsenopyrite, pyrite and goethite. Most of the vein sets are bounded by faults and shear zones, with a dominant E-W east-west strike and subvertical to vertical dips. Vein lengths range from from 5m to possibly 50m, and between 1cm and 40cm in width, averaging 20cm. The main vein system is the San Carlos which was exploited for about 50m along strike. It consists of 2-3 quartz veins with abundant gossan, limonite, drusy quartz and arsenopyrite in a shear zone. Gold values mineralization range from 0.027 g/t Au up to 8.4 g/t Au over 1.2m. Silver values vary between negligible to 39.0 g/t over 1.5m. Arsenic concentrations can exceed the 10% detection limit in gold-rich samples. Lead and Zn concentrations are negligible.

The Victoria Au-Ag zone is located east of the San Markito zone within the Victoria intrusion QFP and diorite rocks near the contact with the sedimentary rocks of the Chimu Fm. Mineralized structures vary from 10 m to 100 m and widths vary from 0.1 m to 0.9 m. Surface vein material is composed of anhedral quartz and secondary iron oxide and hydroxide minerals producing a distinctive dark brown to rusty yellowish brown color. Gold and Ag values vary from trace to 14.4 g/t Au and 927 g/t Ag respectively. Copper values are elevated in most samples to a maximum of 4.29% Cu.

On October 19, 2016, the Company announced that it has completed the Phase I exploration program recommended in the Technical Report. Phase I included geological mapping and sampling, geophysical surveys, data processing, permit applications, and accessibility improvements for the Phase II drill program. The Phase II diamond drilling, which will total up to 3,000m, will focus on targets at the San Markito and Rufina Mineralized Zones. The completed work increased the Company's understanding of the potential of La Victoria and outlined a number of follow-up targets. In advance of the drilling program, the Company embarked on the second phase of a geological mapping and sampling program led by Dr. Osvaldo Arce. This work concentrates on the 3-plus km potential strike length of the San Markito-Victoria silver-gold mineralized breccia zones which have had very limited previous exploration. A new road is being constructed by the Peruvian government that is opening up a key portion of La Victoria which will greatly facilitate the Company as it undertakes this work. In addition, the Company will be completing a detailed soil geochemical survey of Rufina North to better define a potential heap-leachable gold target near a strong IP anomaly outlined in its survey.

Further exploration programs at La Victoria are contingent upon the Company raising an adequate amount of financing.

***Assignment of net smelter royalty on Simkar and Louvicourt***

On May 20, 2016, the Company assigned 1.5% net smelter royalty on Simkar and 0.5% royalty on Louvicourt, in consideration for payment of \$82,000.

### **Investor Relations Firm Retained**

On July 7, 2016, the Company retained Profinnotiv AG (“Profinnotiv”) to provide investor and public relations services in the European market for a period of 12 months, for which, the Company will pay a fee of €2,500 and grant 100,000 stock options entitling Profinnotiv to purchase one common share for \$0.30 until July 6, 2021.

### **Risks and Uncertainties**

The Company is in the exploration stage and has no revenue. During the 6 months ended September 30, 2016, the Company recorded a loss of \$249,461 (2015 - \$260,121) and as at that date, the Company had accumulated deficit of \$24,611,169 (March 31, 2016 - \$24,361,709), working capital of \$201,951 (March 31, 2016 - working capital deficit of \$252,065) and cash flow deficit from operations of \$379,596 (2015 - cash flow surplus of \$12,539). These factors create material uncertainties that may cast significant doubt upon the Company’s ability to continue as a going concern.

In order to continue as a going concern and to meet its corporate objectives, the Company will require additional financing primarily through the issuance of equity to finance its on-going and planned exploration activities and to cover administrative costs. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

The Company is exposed to the inherent risks associated with mineral exploration and development, including the uncertainty of mineral resources and their development into mineable reserves; the uncertainty as to potential project delays from circumstances beyond the Company’s control; and the timing of production; as well as title risks, risks associated with joint venture agreements and the possible failure to obtain mining licenses.

The Company is exposed to commodity price risk. A significant decline in precious and base metal commodity prices may affect the Company’s ability to obtain capital for the exploration and development of its mineral resource properties.

### **Results of Operations**

	<b>3 months ended June 30,</b>		<b>6 months ended June 30,</b>	
	<b>2016</b>	<b>2015</b>	<b>2016</b>	<b>2015</b>
	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>
<b>Expenses</b>				
Professional fees	10,035	6,091	19,190	12,128
Consulting fees	78,415	61,500	142,915	123,000
Stock-based compensation	27,000	-	27,000	-
Investor relations and marketing	57,739	16,380	83,668	69,318
General and office	56,521	20,826	85,006	34,055
Travel	21,983	4,050	28,059	4,050
Loss on sale of marketable securities	-	12,340	-	13,940
Unrealized gain on marketable securities	30,635	(8,237)	(69,852)	(9,876)

<b>Loss</b>	<u>(295,244)</u>	<u>(115,840)</u>	<u>(249,461)</u>	<u>(260,121)</u>

#### **6 months ended June 30, 2016**

The Company recorded a loss of \$249,461 for the 6 months ended September 30, 2016 which is comparable to a loss of \$260,121 for the comparative period in the previous year. Increases in consulting fees, stock-based compensation, investor relations and marketing, general and office and travel, all due to an increase in the level of activity, was offset by an increase in the unrealized gain on marketable securities and a gain of \$82,000 on the assignment of royalty.

#### **3 months ended June 30, 2016**

The Company recorded a loss of \$295,244 for the 6 months ended September 30, 2016 compared to a loss of \$115,840 for the comparative period in the previous year. Increases in consulting fees, stock-based compensation, investor relations and marketing, general and office and travel were due to an increase in the level of activity.

## Summary of Quarterly Results

	Q3 2015 \$	Q4 2015 \$	Q1 2016 \$	Q2 2016 \$	Q3 2016 \$	Q4 2016 \$	Q1 2017 \$	Q2 2017 \$
Revenue	–	3,227	–	–	–	–	–	–
Income (loss)								
- Total	(115,687)	(349,289) <i>(note 1)</i>	(144,280)	(115,840)	(88,903)	(122,296)	45,783 <i>(note 2)</i>	(295,244)
- Per share	(0.02)	(0.03)	(0.01)	(0.01)	–	(0.01)	–	(0.01)

Note 1: Loss included stock-based compensation of \$114,000 and an impairment of the Summit-Gabbre property on \$130,547.

Note 2: Income included an unrealized gain on marketable securities of \$100,487 and a gain of \$82,000 assignment of royalty.

## Liquidity and Capital Resources

The Company is not in commercial production on any of its mineral resource properties, and accordingly, the Company has no revenues. The Company finances its operations by raising capital in the equity markets.

The Company is in the exploration stage and has no revenue. During the 6 months ended September 30, 2016, the Company recorded a loss of \$249,461 (2015 - \$260,121) and as at that date, the Company had accumulated deficit of \$24,611,169 (March 31, 2016 - \$24,361,709), working capital of \$201,951 (March 31, 2016 - working capital deficit of \$252,065) and cash flow deficit from operations of \$379,596 (2015 - cash flow surplus of \$12,539). These factors create material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern.

In order to continue as a going concern and to meet its corporate objectives, the Company will require additional financing primarily through the issuance of equity to finance its on-going and planned exploration activities and to cover administrative costs. There is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

## Changes in Accounting Policies including Initial Adoption

### ***New standards and interpretations not yet adopted***

On April 1, 2016, the Company adopted the following amendment to standards:  
*IAS 1, Presentation of Financial Statements*

Amendments are designed to further encourage companies to apply professional judgment in determining what information to disclose in their financial statements. The amendments clarify that materiality applies to the whole of financial statements and that the inclusion of immaterial information can inhibit the usefulness of financial disclosures. Furthermore, the amendments clarify that companies should use professional judgement in determining where and in what order information is presented in the financial disclosures.

The following new standard will be effective for periods beginning on or after January 1, 2018:

*IFRS 9, Financial Instruments ("IFRS 9")*

This standard will replace *IAS 39, Financial Instruments: Recognition and Measurement*. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Two measurement categories continue to exist to account for financial liabilities in IFRS 9, fair value through profit or loss ("FVTPL") and amortized cost. Financial liabilities held for trading are measured at FVTPL and all other financial liabilities are measured at amortized cost unless the fair value option is applied. The Company has not determined the extent of the impact of IFRS 9 on its financial statements.

The following new standard will be effective for periods beginning on or after January 1, 2019:

*IFRS 16, Leases ("IFRS 16")*

IFRS 16 specifies the requirements to recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. The Company has not determined the extent of the impact of IFRS 16 on its financial statements.

**Critical Accounting Estimates**

The preparation of financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future years affected.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are as follows:

*Impairment of exploration and evaluation*

Expenditures on exploration and evaluation are initially capitalized with the intent to establish commercially viable reserves. The Company makes estimates and applies judgment about future events and circumstances in determining whether the carrying amount of exploration and evaluation exceeds its recoverable amount, including the ability to renegotiate option agreements.

*Warrants*

For private placements of units consisting of common shares and warrants, the Company uses the Black-Scholes option pricing model in determining the fair value of warrants issued, which requires a number of assumptions to be made, including the risk-free interest rate, expected life, forfeiture rate and expected share price volatility.

*Deferred income taxes*

Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates at the reporting date in effect for the period in which the temporary differences are expected to be recovered or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is recognized as part of the provision for income taxes in the period that includes the enactment date. The recognition of deferred income tax assets is based on the assumption that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized.

**Financial instruments and risk management**

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

#### *Due from Cartier and accounts payable and accrued liabilities*

The fair value of due from Cartier and accounts payable and accrued liabilities approximates their carrying value due to their short term to maturity.

#### *Warrants and stock options*

The fair value of warrants and stock options is measured using a Black-Scholes option pricing model. Measurement inputs include share price on grant date, exercise price, expected volatility (based on historical volatility or historical volatility of securities of comparable companies), weighted average expected life and forfeiture rate (both based on historical experience and general option holder behaviour), expected dividends, and the risk-free interest rate (based on government bonds).

#### *Classification of fair value of financial instruments*

The Company classified the fair value of its financial instruments measured at fair value according to the following hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 - quoted prices in active markets for identical assets and liabilities;
- Level 2 - inputs, other than the quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly;
- Level 3 - inputs for the asset or liability that are not based on observable market data

Cash and marketable securities are measured at fair value at Level 1 of the fair value hierarchy.

#### ***Financial risk management***

The Company's activities expose it to a variety of financial risks that arise as a result of its exploration, development, production and financing activities, including credit risk, liquidity risk and market risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

The Board of Directors oversees management's establishment and execution of the Company's risk management framework. Management has implemented and monitors compliance with risk management policies. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities.

#### ***Credit risk***

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises principally from the Company's cash balances. The maximum exposure to credit risk is equal to the balance of cash.

The Company's limits its exposure to credit risk on its cash by holding its cash in deposits with high credit quality Canadian chartered banks.

#### ***Liquidity risk***

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial liabilities that are settled in cash or other financial assets. The Company's approach to managing liquidity risk is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities as they come due. The amounts for accounts payable and accrued liabilities are subject to normal trade terms.

#### ***Market risk***

Market risk is the risk that changes in market prices, such as equity prices, foreign exchange rates, and interest rates will affect the Company's income or the value of its financial instruments. The Company is exposed to equity price risk with respect to marketable securities. The Company's approach to managing equity price risk is to optimize the return from its marketable securities within acceptable parameters for equity price risk. The Company estimates that if the fair value of its marketable securities as at September 30, 2016 had changed by 25%, with all other variables held constant, the loss would have decreased or increased by \$19,385.

#### ***Interest rate risk***

The Company's exposure to interest rate risk is limited due to the short-term nature of its financial instruments. The Company has no interest-bearing debt.

### **Capital management**

Capital of the Company consists of share capital, warrants, contributed surplus and deficit. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern so that it can acquire, explore and develop mineral resource properties for the benefit of its shareholders. The Company manages its capital structure and makes adjustments based on the funds available to the Company in light of changes in economic conditions. The Board of Directors has not established quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain the future development of the Company. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that consider various factors, including successful capital deployment and general industry conditions. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company's principal source of capital is from the issue of common shares. In order to achieve its objectives, the Company intends to raise additional funds as required.

The Company is not subject to externally imposed capital requirements and there were no changes to the Company's approach to capital management during the year.

### **Other Information**
